

Table 2. Odds ratios for spontaneous preterm births by number of prescriptions during pregnancy. For each group the comparison is performed against the group of patients without BV and without exposure to medication as shown in the last row.

# of prescriptions	# PTB n(%)	Term	Total	OR [95% CI]
1	3388 (7.3)	42,565	45,953	1.30 [1.26, 1.35]
2	935 (7.6)	11,347	12,282	1.35 [1.26 1.44]
≥ 3	464 (8.3)	5118	5582	1.48 [1.35, 1.63]
No BV & no medication	125,815 (5.7)	2,061,443	2,187,258
